Michigan State University believes we can empower and prepare our students for the rigors of higher education by sharing University resources and developing diverse and enriching educational programs before students reach college-age. In addition to the University’s Pre-college programs, the Pre-college Scholarship Program is just one more way we encourage and support students who want to become Spartans, ensuring their greater academic success. Recipients share in their own words how this scholarship and MSU Pre-college Programs impacted them:

“As a sophomore in Zoology and specialization in Environmental studies, I use the skills I gained in 4-H everyday. It has instilled in me the need to get involved with all that I can, and the want to help others. 4-H had a huge impact on my decision to attend MSU and the things I do every day!” - Jennifer Schuster

“[MSU Pre-College Programs] affected my desire to be a Spartan and exposed me to the multitude of programs and opportunities MSU has to offer. The scholarship support was extremely helpful and appreciated.” - Alex Lott

“I attended the Exploration Days program here at MSU. I attended this program for 5 years starting in 7th grade and I met so many great people and it was a great experience to learn to be independent at such a young age. I got the scholarship in 8th grade. The scholarship helped me pay for my first year here at MSU.” - Alisha Myers
